HELI

Lithium Forklift Batteries

Industrial Forklifts
HELI MASTER DISTRIBUTOR

Safe, long-lasting lithium batteries are the beating heart of all Heli electric forklifts.

Choose Heli for Safety & Durability

- Batteries made with lithium iron phosphate (LFP)
- Safest track record for all forklift batteries
- Charges in 2-3 hours
- 92% charger efficiency
- Can use the forklift in the rain
- Rigorously tested for physical durablilty

Advantages of Heli Forklifts Using Heli LFP Batteries

- Nearly maintenance-free
- One hour's charge per 8-hour shift keeps the battery at 100%
- Pairs with Heli "intelligent" chargers for 90+% efficiency charging
- Speed under load almost the same as unloaded

Heli Electric Forklift Example:

CPD20/25/30/35

- **Uses an 80-volt lithium battery**
- **4000 - 7000 lbs. capacity range**
- **Auto-decelerates on turns for safety** (preset)
- **Onboard charger that self-adjusts for safe charge** (Optional)

LFP Battery Efficiency Ratings

Life	High, ~4000 cycles
Energy Consumption	6 KWh/hour
Charging Time	2-3 Hours/shift
Electric Charge	$0.23/KWh
