HELI
Intelligent Chargers

Industrial Forklifts
HELI MASTER DISTRIBUTOR

Keep your electric forklifts well-charged with a battery charger from Heli. They work with all electric forklift types, not just Heli forklifts!

Why go with an "intelligent" charger?

- Self-adjusts charging flow to avoid power spikes
- Communicates with battery to determine power levels and charge safety
- High power capacity with steady charging flow
- Designed for large-scale lithium batteries

Advantages of Using Heli Chargers for Your Forklifts

- Fits in a small space easily.
- Easy operation with LCD display and a 'charging gun'. Just plug in and charging starts.
- Keeps your forklift batteries charged and stable for a long time!

Choose the matching charger to your electric forklifts:

LI-423UL

240V AC Input Voltage

Rated for 80V and 48V lithium-ion forklift batteries

LI-4UL48

480V AC Input Voltage

Rated for 80V and 48V lithium-ion forklift batteries

LI-437

220V AC Input Voltage

Rated for 80V and 48V lithium-ion forklift batteries

HWCM1

110V AC Input Voltage

Built-in on board charging solution

Electric Forklift Savings Example (5K lbs lift)

kWh Draw	47 kW per hour
Energy cost/kWh: **$0.13**	$5.99 per hour
Charging time: **2.5 hrs**	$14.96 per recharge
Run time: **10 hrs**	**$1.50 energy cost per hour**
